INTERESTING

NEW - Scroll down below the photo for a listing of Morse code coast stations that can still be heard on the air. Click on their call signs to go directly to a KPH Kiwi receiver tuned to their frequency to hear them live.

There are a total of seven GPS disciplined Kiwi receivers available. One receiver is connected to the Marconi T antenna and is dedicated to LF/MF reception. Six receivers are connected to the TCI-530 antenna for 3 to 30MHz reception.

The LF/MF Kiwi is [HERE](#)

The HF Kiwis are [HERE](#)

Enjoy!

The receive site at Point Reyes was selected by none other than Dr. Harold Beverage. He was looking for a location at the edge of the ocean with plenty of flat land for antennas and a very low electrical noise level for point to point HF reception. The site that became known as RS on the order wire fit the bill. The station began service in 1930. Coast station KPH moved to the site in 1946.
